CAPABILITY METHODS LLC · SERVICES OVERVIEW

From AI-readiness clarity to a working platform

Three ways to work with us — diagnose where you stand, keep the roadmap moving, and build what matters.
For executives and operations leaders at growing businesses.

Tier 1 Diagnostic · Tier 2 Fractional Leadership · Tier 3 Platform Project

THE CHALLENGE

AI and operations decisions are getting made faster than they’re understood

1

Everyone is being asked about AI — few have a clear starting point

Boards, customers, and staff want an answer. Most businesses don’t know where they stand on data, process, or governance.

2

Spending comes before understanding

Tools and platform changes get approved before anyone has checked whether the operation, the data, or the controls are ready for them.

3

Plans stall without ownership and follow-through

A good roadmap still needs someone senior to keep it moving, and someone to build it — without a full-time hire.

Capability Methods

OUR APPROACH

Senior, independent, and built for businesses your size

1

Right-sized

Methods adapted from enterprise frameworks (ISO/IEC 42001, NIST AI RMF) and scaled for $1M–$15M businesses — not a 6-month study.

2

One named lead

The same principal consultant scopes, delivers, and reports at every tier. No rotating bench, no account handoffs.

3

Fixed and predictable

Fixed fees, written scope, and clear caps. You know what you're buying before you sign.

4

Operations and AI together

We assess how the business runs and how ready it is for AI as one picture, not two separate projects.

5

Scoped around what you own

Recommendations start from the platforms and licenses you already have. Any chargeable add-on is flagged in writing, never assumed.

6

Built to hand off

Every engagement ends with something your team can run without us: a roadmap, a report, or a documented build.

THE OFFERING

Three tiers, one path from clarity to capability

1 TIER 1

Diagnose

AI & Operations Readiness Diagnostic

Where do we really stand, and what should we fix first?

3 weeks · $8,500 fixed

(typically $6,500–$12,000)

2 TIER 2

Sustain

Fractional Transformation Leadership

Keep the roadmap moving with a senior advisor, without a full-time hire.

Monthly · $4,500 / month

(typically $3,500–$6,500)

3 TIER 3

Build

Platform / AI-Readiness Project

Design and implement the platform or AI-readiness foundation you need.

6–12 weeks · from $15,000

(fixed fee, 3 milestones)

© 2026 Capability Methods — trademarks of Capability Methods LLC

TIER 1 · DIAGNOSE

Diagnostic: five deliverables in three weeks

1

D01 Kickoff & Alignment

Confirm objectives and scope; finalize the interview schedule.

2

D02 Current-State Assessment

5–8 stakeholder interviews plus a review of existing tools and workflows.

3

D03 Gap Analysis & Findings Report

Your top 3–5 blockers in plain English, each with business impact and a recommended action.

4

D04 Executive Readout

A live walkthrough of the findings with your leadership team.

5

D05 Phased Roadmap

What to fix now, next, and later — usable with or without further help.

INVESTMENT

$8,500

fixed fee · typically $6,500–$12,000 by company size

- ✓ 3 weeks, start to finish
- ✓ 50% at signing, 50% at delivery
- ✓ No software cost
- ✓ No long-term commitment

Best for leaders who need an independent answer before they commit real budget to AI or a platform change.

TIER 2 · SUSTAIN

Fractional leadership: a senior advisor, every month

1 2 working sessions a month

60-minute bi-weekly sessions that drive the roadmap forward.

2 Async access between sessions

Quick questions answered without waiting for the next meeting.

3 A written Monthly Progress Report

What moved, roadmap status, what's next, and hours used.

4 A Quarterly Roadmap Review

Every third month: re-prioritize and confirm the value.

Two ways to start

Path A: after a Diagnostic, Month 1 executes against your existing roadmap. Path B: no prior work, so Month 1 opens with a condensed ~2-week current-state capture.

INVESTMENT

$4,500

per month · typically $3,500–$6,500 by size and scope

- ✓ Up to 12 hours / month
- ✓ 3-month minimum term
- ✓ Then month-to-month, 30 days' notice
- ✓ Invoiced in advance

TIER 3 · BUILD

Platform Project: three milestones, one clean handoff

1	30% of fee	2	30% of fee	3	40% of fee
Milestone 1 — Kickoff		**Milestone 2 — Midpoint**		**Milestone 3 — Final Delivery**	
Scope Baseline approved, platform access confirmed.		Design signed off and the core build demonstrated against its acceptance criteria.		All deliverables accepted, handoff package delivered, handoff session held.	

Four platform paths, one structure

Google Cloud · **Open-source stack** · **Your existing platform** · **Salesforce**

From $15,000 per project, set by scope (typically up to $40,000) · typically 6–12 weeks · licenses and cloud costs are yours; any chargeable add-on is flagged in writing before signing · includes a 30-day defect-correction window.

THE JOURNEY

Start where you are: every tier stands on its own

1 Tier 1 **Diagnose** → 2 Tier 2 **Sustain** → 3 Tier 3 **Build**

A

Not sure where to begin?

Start with the Diagnostic. In three weeks you have a scored picture, your top 3–5 gaps, and a Now / Next / Later roadmap.

B

Already know what needs doing?

Go straight to Tier 2 or Tier 3. A short, condensed current-state step comes first, using the same rubrics as the Diagnostic.

C

Finished a Diagnostic?

Your roadmap carries forward. Tier 2 or Tier 3 starts from it directly, with no repeat assessment.

THE COMMON THREAD

One consistent yardstick runs through every tier

1

Operating Model Maturity

4 dimensions

Customer & value focus, process discipline, team alignment, and continuous improvement: how the business actually runs.

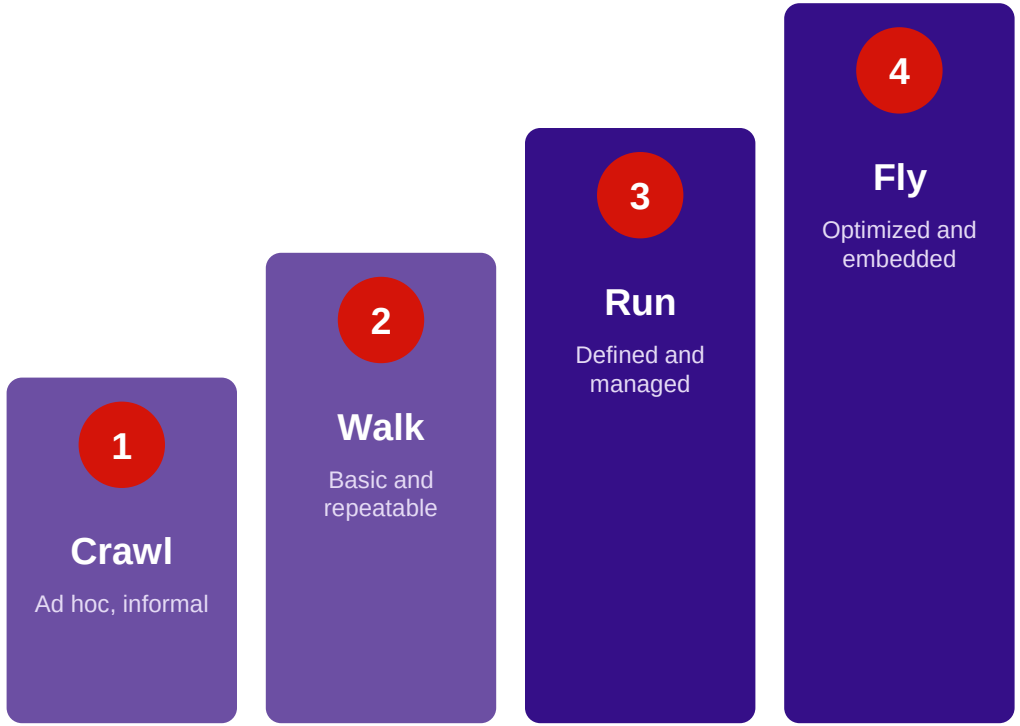

2

AI Readiness

6 domains

Governance, data privacy, risk assessment, third-party AI, training, and policy. Adapted from ISO/IEC 42001 and the NIST AI Risk Management Framework.

Each scored on a 4-point scale

SIDE BY SIDE

Which tier fits? A quick comparison

	Tier 1 · Diagnose	Tier 2 · Sustain	Tier 3 · Build
Best when you…	Need an independent picture before spending	Need senior help keeping a roadmap moving	Know what to build and need it delivered
Duration	3 weeks	3-month minimum, then monthly	Typically 6–12 weeks
Investment	$8,500 fixed (typically $6,500–$12,000)	$4,500 / month (typically $3,500–$6,500)	From $15,000 fixed, by scope
How you pay	50% at signing, 50% at delivery	Monthly, invoiced in advance	30% kickoff / 30% midpoint / 40% final
Our commitment	Five deliverables, including a live Executive Readout	Up to 12 hours a month, a written monthly report	Written scope, milestone acceptance, handoff package
You walk away with	Scored findings, top 3–5 gaps, phased roadmap	A roadmap that keeps moving, with progress you can see	A working, documented build your team owns

BUILT-IN SAFEGUARDS

Predictable by design: cost, scope, and exit are clear up front

1

Fixed fees, never hourly

Every tier is a fixed fee, with a published typical range.

2

Written scope

Deliverables and acceptance criteria are in the agreement before work starts.

3

Capped hours

Tier 2 states up to 12 hours a month plainly, so expectations match.

4

Change-order discipline

Tier 3 work outside the agreed milestones goes through a written change order.

5

Light commitments

Tier 1 has no long-term commitment; Tier 2 is month-to-month after 3 months.

6

No surprise software bills

No software cost in Tier 1; platform costs in Tier 3 are yours and flagged in writing.

WHO YOU'RE WORKING WITH

Mark Katanani — Principal Consultant

The same named lead at every tier: scoping, delivery, reporting, and handoff. No rotating bench, no account handoffs.

- ✓ TOGAF/DFSS
- ✓ Lean Six Sigma Master Black Belt
- ✓ SAFe Release Train Engineer (RTE)
- ✓ U.S. patent holder — AI/ML-based defect prediction
